

PROGRAMME

	Session 1: New opportunities at FLASH		Chair: Stefan Duesterer (DESY)
13:00	Welcome (S. Düsterer and M. Gühr)	S. Duesterer/ M. Gühr	DESY/Uni Postdam
13:10	Optical Laser Infrastructure at FLASH 1 and 2	I. Hartel	DESY
13:30	Free electron characteristics of FLASH 1 and 2	S. Schreiber	DESY
13:50	Beamline characteristics for the new instrument	S. Duester	DESY
14:10	Presentation of instrument capabilities	M. Gühr	Uni Postdam
14:30	Discussion		
15:10	<i>Coffee break</i>		
	Session 2: Scientific opportunities opened by the URSA-PQ Instrument		Chair: Markus Gühr (Uni Potsdam)
15:50	Mapping chemical interaction dynamics with photoelectron spectroscopy at FLASH	Phillipe Wernet	Helmholtz Zentrum Berlin
16:15	Structure and dynamics of atoms and molecules in different charge states probed by FLASH	Raimund Feifel	Gothenburg University
16:40	Two color investigation of core hole relaxation: Dynamics of Atoms and Clusters at FLASH	Tommaso Mazza	European XFEL
17:05	Opportunities for 5 min Presentations and Discussions from the user community		
17:50	Summary	M. Gühr/ S. Duester	Uni Potsdam/DESY
